SUMMARY

Highly effective and productive software engineer with over 8 years of experience, specializing in web technologies and design.

EXPERIENCE

Vanta • September 2025 - Current

Senior Software Engineer

- Building a remote, sandboxed, agentic development environment from scratch, integrating terminal, chat, Jira ticket handoff, browser controls without need for port forwarding, and deep Git capabilities; garnering contributions and high-praise feedback across the engineering organization.
- Developing a deployment lifecycle dashboard, enabling direct commit-level deployments and rollbacks between staging and production environments.
- Integrating several new third-party vendors, allowing customers to seamlessly ingest data from the providers they use.
- Delivering an automated penetration testing integration that surfaces security evidence and reports directly within the platform.
- Mentoring backend and full stack engineers on web best practices and automated testing.

Uber • June 2022 - September 2025

Frontend Software Engineer II

- Designed the UI and systems for incentive platforms used by over 5 million earners, utilizing over $1 billion in business investment.
- Ideated, designed, and built an incentive management platform utilized by operations, data science, and engineering teams across the globe, taking user workflows from hours to minutes.
- Built core functionality and components for a UI library that is used by 15 different apps, in client and server-driven contexts.
- Lead engineer for web platform libraries, including a component library, utility library, and automatic API documentation library used by web engineers across the company.
- Presented new techniques for testing and building internal tooling to all web engineers at the company.
- Mentored other web engineers on web best practices and adding analytics capabilities to their apps.
- Repeatedly stood at the 95th+ percentile on change and review count.

Marqeta • November 2021 - June 2022

Frontend Software Engineer II

- Created new, highly performant and pixel-perfect web components, used throughout the main product.
- Implemented novel testing patterns and defined a new monorepo structure for use throughout the company.
- Partnered with frontend engineering teams throughout the company to build developer tooling and components for their projects.
- Built web experiences for the main company product, perfectly matching designs.

IMT Insurance • June 2020 - August 2021

Full Stack Engineer

- Defined requirements, designed and implemented features for an entirely new insurance management platform.
- Led design system development for components used throughout the main platform.
- Mentored junior and test engineers, teaching technologies and encouraging development in the platform.

EDUCATION

Vanderbilt University • December 2022

Master of Science Computer Science

Central College • May 2020

Bachelor of Arts Computer Science

PROJECTS

Pytho pytho.app • github.com/krafted/pytho

Social Python editor playground in the browser

Extro extro.app • github.com/sammagee/extro

Privacy-focused app to retrieve iOS messages and voicemails

SKILLS

JavaScript/TypeScript, Playwright, HTML, CSS, React, Vue, Go, GraphQL, Python, PHP, Java, Swift
